Strategy Tab- Showing details of the setups and what all operations required in each setup. Roughing is selected here and highlighting what all are machining in that operation

The screenshot displays the Objectify Technologies software interface. At the top, the breadcrumb navigation shows 'Objectify Technologies Pvt Ltd > Projects > Demo', and a dropdown menu is set to 'Aluminum (Metric)'. The main navigation bar includes 'Overview', 'Setups 2', 'Tools 3', 'Strategy' (which is the active tab), and 'Estimate'. An 'Export to Fusion' button is located on the right side of the navigation bar.

The central workspace features a 3D model of a rectangular block with a hole, a top-down view, and a list of manufacturing operations. The 3D model is shown in a perspective view with a yellow cone indicating a specific feature. The top-down view shows the block's footprint with a central hole. The list of operations is as follows:

Setup	Operation	Material	Features	Time
Setup 1	1/4 Roughing	T3 12mm 5F Flat	2 features	1m 19s
	2/4 Facing Finishing	T3 12mm 5F Flat	1 feature	14s
	3/4 Finishing Wall	T3 12mm 5F Flat	1 feature	7s
	4/4 Drilling	10mm Drill 135°	1 feature	16s
Setup 2			4 operations	2m 39s

At the bottom left, the dimensions '100 x 32.5 x 50 mm' are displayed. A 'Tool' button is located at the bottom right. The bottom right corner shows 'Showing refined times' and a link to 'Switch to fast times'.

When we expand the Roughing operation, all details are showing like features, Cutting conditions, Cycle time , MRR etc. as seen in screenshot
