Quotation

Quote no. ENQ-001
Date 06 Nov 2026
Prepared by ShiaanX

Customer	Demo Customer
Part	Motor Mount
Quantity	40 pcs
Material	aluminium 6061

Price and delivery

Unit price	INR 4,200
Order total (40 pcs)	**INR 1,68,000**
Lead time	21 working days from order confirmation
Quote valid for	30 days
Payment terms	50% advance

Typical build-up: material 0 + machining 17 + quality check 1 + dispatch 1 working days, plus any wait for machine time.

Notes
Sample

Manufacturability review (DFM)

Manufacturable on 3-axis after design changes. 2 item(s) needing a design change, 23 worth a look, 1 checks passed.

Part size: 55.3 x 104.8 x 21.5 mm

Finding	Why it matters	Measured / expected
Needs a design change Internal corner (0.50, 0.00)	A rotating cutter cannot make an internal corner sharper than its own radius, and a small cutter has to run slowly at short reach - so tight deep corners cost cycle time or need EDM.	radius mm 0, depth mm 0.5, corner angle deg 90 / min radius mm 0.5
Worth a look Flat bottom hole dia 2.53 x 2.50 mm (Z)	A drill leaves a 118-140 deg cone, so a flat-bottomed hole needs an extra end-mill or flat-bottom-drill operation.	dia mm 2.53, depth mm 2.5, bottom flat / bottom drill point (118 deg) or through
Worth a look Hole dia 2.529 mm (nearest dia 2.5)	A diameter that is not a stock drill size needs a special drill or a second interpolation / reaming operation.	dia mm 2.53, machining plan drill DRILL_2.0MM, possible thread M3 / nearest standard dia mm 2.5
Worth a look Text / logo (915 faces)	Text and logos need a tiny engraving cutter and a long, slow toolpath; laser marking is usually cheaper if the marking is not structural.	faces 915, depth mm 1.5, min internal radius mm 0.05, extent mm 19.02 x 38.52 x 1.5 / tool engraving cutter / V-bit, or laser mark
Worth a look EM_2FL_3MM (dia 3 mm)	Areas only a small end mill can reach run at a fraction of the normal removal rate, driving cycle time.	tool EM_2FL_3MM, dia mm 3, minutes 23.8 / source machining plan machining plan
Worth a look 852 mm3 unreachable	Material no 3-axis setup direction can reach needs a 4th/5th axis, special tooling or a design change.	unreachable mm3 851.6, removal volume mm3 147765.9 / unreachable mm3 0

Exclusions

Prices exclude GST 18%, shipping, special inspection, surface treatment.
